

Import / export option

There are 3 new button:

- Load(*.pbu)
- Save(*.pbu)
- Load (*.csv)

Market_Name	Horse_Name	S1	S2	LL
15:10 Folk	Wiesenfurst	2	1	
15:10 Folk	Normandy Landi...	1	2	
15:10 Folk	Aboukir Bay	3	4	1
15:10 Folk	Ballymorn	4	3	
15:15 DownP	Get It Sorted	1	1	
15:15 DownP	Lock Mor Lad	2	2	
15:15 DownP	Lord Multifix	3	3	1
15:15 DownP	Brave Heart	4	4	
15:20 Bang	Braveheart Move	1	1	
15:20 Bang	Ciceron	2	2	
15:20 Bang	Devil To Pay	3	3	
15:20 Bang	Stir On The Sea	4	4	1

Delete List Reload last saved list Load(*.pbu) Load (*.csv)
Save List Save(*.pbu) List Separator: ,

The “Save(*.pbu)” button saves the personalized list with the extension .pbu (ProBotUk) This extension is created for the “probot” and helps user to save / load the pesonalized list. The users could save the list and load it in a different copy of the probot.

The “Load (*.csv)” helps users to load the list from a personal file with the following formatting:

	A	B	C	D	E	F
1	Market_Name	Horse_Name	S1	S2	LL	
2	15:10 Folk	Wiesenfurst		2	1	
3	15:10 Folk	Normandy Landings		1	2	
4	15:10 Folk	Aboukir Bay		3	4	1
5	15:10 Folk	Ballymorn		4	3	
6	15:15 DownP	Get It Sorted		1	1	
7	15:15 DownP	Lock Mor Lad		2	2	
8	15:15 DownP	Lord Multifix		3	3	1
9	15:15 DownP	Brave Heart		4	4	
10	15:20 Bang	Braveheart Move		1	1	
11	15:20 Bang	Ciceron		2	2	
12	15:20 Bang	Devil To Pay		3	3

Market_Name must be composed with race time plus the name of the race-course, is the same format used in the tree events of Betfair under the heading 'Horse Racing - Today's Card' (like in the figure on the righth).

Horse_Name is horse’s name as show in Betfair markets

S1 S2 LL are the strategy and here the user must set the rating (1,2,3,4 for S1 and S2. 1 for the LL)

The file csv must include a header line, if not present the program return an error

Header Line must be so composed:

Market_Name Horse_Name S1 S2 LL

If the names of the columns are different the program return an error.

The list separator character (it is important to read the csv file) is automated settled and depends on the language settings of the computer, but could be that some users use particular character to make csv file , so in this case the users can set it manually.
